

Random Thoughts Regarding AARG EmComm Trailer

- Why should we obtain/create a trailer?
- How would it be deployed before/during/after weather events?
- Use during non-weather events – community outreach, POTA, field day, kids day etc.?
- Where would it be stored when not in use, theft prevention?
- What radio gear to stock it with – HF, VHF, GMRS, Winlink, Starlink?
- Antennas, bandpass filters, batteries, generators, inverters?
- Emergency supplies, tarps, first aid, fire extinguishers, water?
- How do we pay for it – Assessments, donations, grants - who is willing to write grant proposals?
- Cost study needed – acquisition, equipment, maintenance, registration, insurance for trailer and radio gear, advertising (logo placements)
